Non-return valve

TJO System

Technical Data Sheet

Description

This non-return foot valve is designed for clear water pumping systems with substantial flow, requiring large valves for supply systems. It guarantees excellent hydraulic performance.

- Operation in any position
- Reliable, robust, simple
- Minimum head loss
- Closing system : tripod formation with hydraulic profile with release spring
- Sealing ensured by a pliable O-ring on a rigid seat
- Long axial guiding

Important :

The indicated pressure for the different categories of fluids (L1/L2/G1/G2) is under no condition a guarantee of use. Therefore, it is essential to validate the use of products under given operating conditions. The operating instructions are available on our website www.socla.com or by simple request from our sales department.

Technical features

Operating temperature	-10 °C to 80 °C
Permissible operating pressure (PFA) in water	See table above
Maximum permissible pressure (PS) other mediums	See table above
Connection	Female / Female, BSP
Mediums	Clear liquids, gas
